**December Property Tax Payments were due Dec. 11:** Late payments are now being charged 8% **annual** interest. What does that mean? How does one calculate the actual total amount due?

1) Calculate the number of days payment is overdue. For example, if sending payment on December 21, the number of days overdue is 10.

2) Multiply the original amount due by 0.08 to calculate the annual interest. Divide that annual interest by 365 to calculate the daily interest. Then, multiply the daily fee by the number of days overdue to get the interest due.

3) Add the interest due to the amount of your property tax bill.

The late fee due is calculated as of the postmarked envelope or in-person payment.

Partial payments are allowed. The Tax Office can also accept payments by credit card in person and over the telephone. [warnernh.gov/departments/taxes/](http://warnernh.gov/departments/taxes/)

The **Supervisors of the Checklist** will meet in a Public Session on the 2nd floor of the Warner Town Hall from 10 to 11 AM on **Friday, January 2, 2026**.

## News to Use

### Time for a Scroll-Free January?

In a recent New York Times op-ed, Ezra Klein notes that algorithms do not necessarily show us what we **want to see**, but rather **what we cannot look away from**. [Gift article from NYT](#), shared by Bobbi Slossar of NH State Library along with these thoughts: On modern social media platforms, we spend surprisingly little time engaging with content from the people who matter most to us. On Instagram, only about 7 percent of time is spent viewing posts from friends and family (approximately 14 percent on Facebook). More importantly, social media algorithms are **designed to capture and hold attention**.

Common Sense Media [surveyed](#) pre-adult teens and discovered that **half of the teen respondents used AI chatbots for companionship** because they offered safer and more accepting alternatives to risk-filled human relationships.
